Certified according to
Greenguard gold Guidelines

D-Com | D-Com is the ideal communications workplace for integrating flatscreens, phones, computers and other devices. The desk is very stable and its modular structure allows for different desk types and extension stages. The work area and screen holding system (railing) are height-adjustable at the press of a button. For easy access to the cable tray, the worktop is available in one or two pieces. The optional equipment space offers plenty of storage without limiting the legroom. The high requirements of the applicable workplace directives, such as European standard EN 527-1:2011, are not only met but even surpassed. The cable management system which is available in various designs guarantees easy access. The displays are conveniently adjustable in all directions. They remain free of vibration in up to two stacked levels. The desk can be supplemented with a variety of accessories and is adaptable for different ventilation and cooling systems, such as Cool-Top. The desktop dimensions, materials, radii and colours can be chosen freely.
